DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Group I - a semiconductor device comprising discontinuous and continuous active regions and a dummy gate for separation being provided between the gates of the two MISFETs of the second type, as recited in claims 1-3 and 7-8;

Group II - a semiconductor device comprising discontinuous and continuous active regions and the discontinuous active region being designed to have a width in the range greater than or equal to five times the gate length and less than or equal to 8.5 times the gate length, in the gate length direction, as recited in claims 1-2, 4-5 and 7-8;

Group III - a semiconductor device comprising discontinuous and continuous active regions, a second discontinuous active region being surrounded by the trench isolation and in which only a gate of MISFET is placed, and a second continuous active region which is surrounded by the trench isolation and in which gates of three or more respective MISFET are arranged, as recited in claims 1-2, 6, and 7-8;

Group VI – a semiconductor device comprising discontinuous and continuous active regions, and a dummy gate provided between the trench isolation and one of the gates of the MISFETs of the second type located at an end thereof in the continuous active region, as recited in claims 1-2, 7-8 and 9;

Application/Control Number: 10/656,199

Art Unit: 2814

Group V - a semiconductor device comprising discontinuous and continuous active regions and a distance between the trench isolation and one of the gates of the MISFETs of the second type located at an end thereof in the continuous active region being greater than or equal to four times the gate length, as recited in claims 1-2, 7-8 and 10-11.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-2 and 7-8 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Application/Control Number: 10/656,199 Page 4

Art Unit: 2814

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is (571) 272-1703. The examiner can normally be reached on Monday Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (571) 272-1705. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Application/Control Number: 10/656,199
